BNP PARIBAS COMMODITY FUTURES LIMITED - CLEARING MEMBER DISCLOSURE DOCUMENT DIRECT AND INDIRECT CLEARING

Introduction: What is the purpose of this document?

The purpose of this document is to enable us to comply with our obligations as a clearing member under EMIR¹. EMIR requires that if we provide services to you that involve us clearing derivatives through an EU central counterparty (**CCP**), we must:

- Offer you a choice of an individual client account or an omnibus client account (as discussed under *"The types of accounts available"* in Part One B below);
- Publicly disclose the levels of protection and costs associated with different levels of segregation; and
- Describe the main legal implications of different levels of segregation.

Additionally, to enable us to comply with our obligations as a clearing member under the Indirect Clearing RTS², which require that, where we are providing services to you that involve us facilitating the indirect clearing of derivatives through a CCP, we must:

- Offer you a choice of a Basic Omnibus Indirect Client Account or a Gross Omnibus Indirect Client Account (as discussed under *"The types of accounts available"* in Part One B below);
- Publicly disclose the levels of protection and costs associated with different levels of segregation;
- Publicly disclose the general terms and conditions under which we provide indirect clearing services (as discussed under *"Disclosure of general terms and conditions of Indirect Clearing Arrangements"* in Part One D below); and
- Describe the main legal implications of different levels of segregation.

We have provided the costs associated with the different levels of segregation separately. Details can be found at:

https://cib.bnpparibas.com/our-solutions/global-markets_a-34-39.html

¹ Regulation (EU) No 648/2012 on OTC derivatives, central counterparties and trade repositories.

Throughout this document references to "we", "our" and "us" are references to the clearing broker. References to "you" and "your" are references to the client.

² Commission Delegated Regulation (EU) No 2017/2154 supplementing Regulation (EU) No 600/2014 with regard to regulatory technical standards on indirect clearing arrangements, and Commission Delegated Regulation (EU) No 2017/2155 amending Commission Delegated Regulation (EU) No 149/2013 with regard to regulatory technical standards on indirect clearing arrangements.

In respect of the treatment of margin and collateral at CCP level you should refer to the CCP disclosures that the CCPs are required to prepare.

Organisation of this document

This document is set out as follows:

- Part One A provides some background to clearing.
- Part One B gives information about the differences between the individual client account, the omnibus client account, the Basic Omnibus Indirect Client Account and the Gross Omnibus Indirect Client Account, explains how this impacts on the clearing of your derivatives and sets out some of the other factors that might affect the level of protection you receive in respect of assets provided to us as margin.
- Part One C sets out some of the main insolvency considerations.
- Part One D sets out a general overview of the terms and conditions under which we provide indirect clearing services.
- Part Two provides an overview of the main variations on the different levels of segregation that the CCPs offer, together with an explanation of the main implications of each, and sets out links to further information provided by the CCPs. For the position relating to any particular CCP you should refer to the disclosure and any other information prepared by the CCP.

Important

Whilst this document will be helpful to you when making your selection of account types, this document does not constitute legal or any other form of advice and must not be relied on as such. This document provides a high level analysis of several complex and/or new areas of law whose effect will vary depending on the specific facts of any particular case and some of which have not been tested in the courts. It does not provide all the information you may need to make your decision on which account type or level of segregation is suitable for you. It is your responsibility and, where applicable, the responsibility of your clients to review and conduct independent due diligence on the relevant rules, legal documentation and any other information provided on each of the account offerings and those of the various CCPs on which we clear derivatives for you and, where applicable, your clients. You and, where applicable, your clients may wish to appoint independent professional advisors to assist with this.

We shall not in any circumstances be liable, whether in contract, tort, breach of statutory duty or otherwise for any losses or damages that may be suffered as a result of using this document. Such losses or damages include (a) any loss of profit or revenue, damage to reputation or loss of any contract or other business opportunity or goodwill and (b) any indirect loss or consequential loss. No responsibility or liability is accepted for any differences of interpretation of legislative provisions and related guidance on which this document is based. This paragraph does not extend to an exclusion of liability for, or remedy in respect of, fraudulent misrepresentation.

Please note that this disclosure has been prepared on the basis of English law save as otherwise stated. However, issues under other laws may be relevant to your due diligence. For example, the law governing the CCP rules or related agreements; the law of the jurisdiction of incorporation of each CCP; and the law of the location of any assets.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

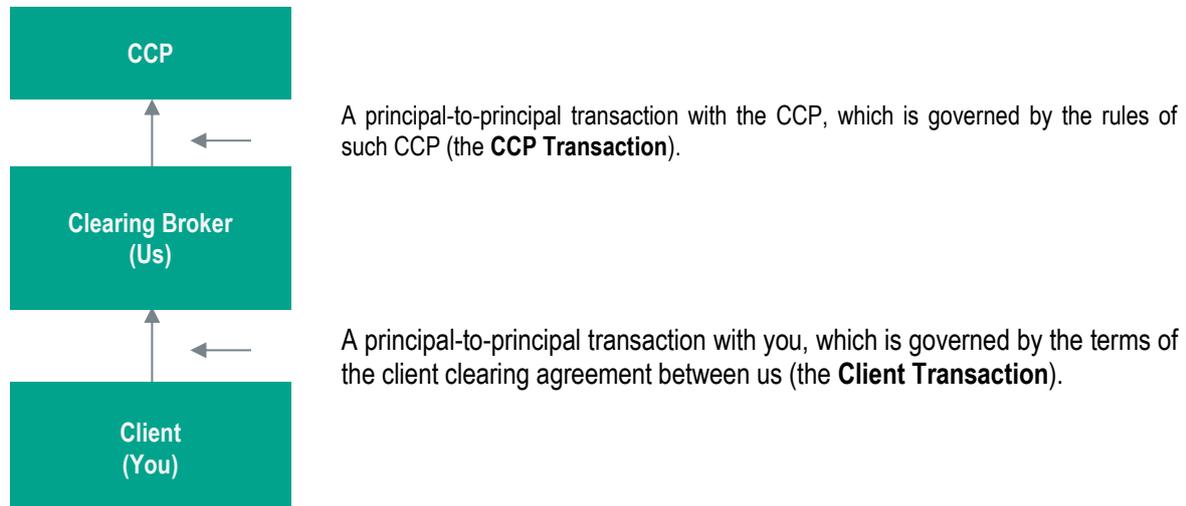

Part One A: A brief background to clearing

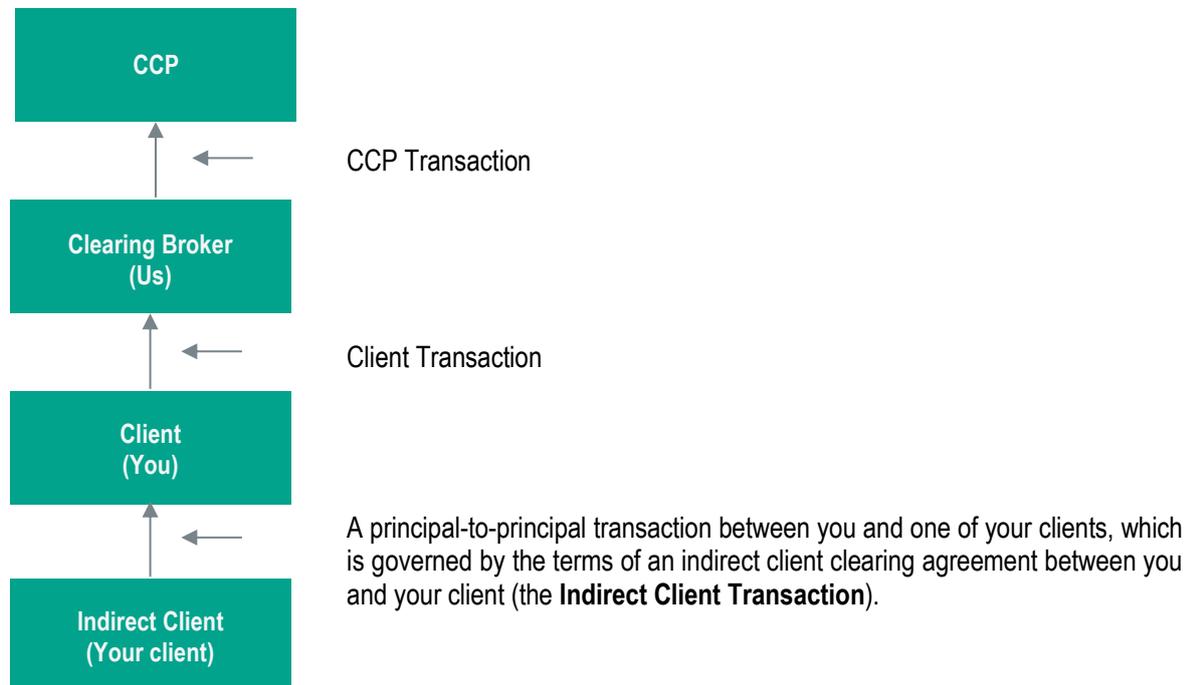

The market distinguishes two main types of clearing models: the "agency" model and the "principal-to-principal" model. This document assumes that all transactions are cleared according to the "principal-to-principal" model.

The "principal-to-principal" clearing model

When clearing transactions for you through a CCP, we usually enter into two separate transactions:

Additionally, where we facilitate indirect clearing services, i.e. facilitate the clearing by you through us of positions for your own clients, you may enter into a third principal-to-principal transaction with one of your clients:

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

The terms of each Client Transaction are equivalent to those of the related CCP Transaction, except that (i) each Client Transaction will be governed by a client clearing agreement between you and us and (ii) we will take the opposite position in the CCP Transaction to the position we have under the related Client Transaction. Similarly, where applicable, the terms of each Indirect Client Transaction are equivalent to those of the related Client Transaction which, in turn, is equivalent to those of the related CCP Transaction, except that (i) each Indirect Client Transaction will be governed by an indirect client clearing agreement between you and your client, and (ii) you will take the opposite position in the Client Transaction to the position you have under the related Indirect Client Transaction.

A Client Transaction will arise without the need for any further action by either you or us, as soon as the CCP Transaction arises between us and the CCP. Once both of those transactions have been entered into, your transaction is considered to be "cleared". Similarly, where applicable, we expect that under the terms of the indirect client clearing agreement between you and your client, an Indirect Client Transaction will arise without the need for any further action by either you or your client, as soon as the Client Transaction arises between you and us. Once all three of those transactions referred to above have been entered into, your client's transaction is considered to be "cleared".

As the principal to the CCP, we are required to provide assets to the CCP as margin for the CCP Transactions that relate to you and your clients and to ensure that the CCP has as much margin as it requires at any time. We will therefore ask you for margin and, if you provide it in a form which we cannot transfer to the CCP, we may transform it into a form acceptable to the CCP. If you have provided us with margin assets, you may face what we call "transit risk" - this is the risk that, if we were to default prior to providing such assets to the CCP, the assets that should have been recorded in your account at the CCP will not have been recorded in your account and will not benefit from the protections described below under "*What happens if we are declared to be in default by a CCP?*". Transit risk might be mitigated where a clearing member holds margin in the form of cash as client money (see "*How would client money treatment in accordance with the FCA client money rules differ from title transfer?*" below).

However, in many cases you may not actually face transit risk because the CCPs often call margin from us early in the morning so we will often use our own funds to satisfy the margin call and then seek to recover such amount from you. In these cases we are exposed to you for the interim period.

If we are not a member of such CCP ourselves, we may offer you alternative solutions:

- Where we do not facilitate indirect clearing services provided by you, we may enter into a principal-to-principal transaction with an affiliate or third-party clearing broker which is a member of such CCP, instead of a principal-to-principal transaction directly with such CCP. Such arrangements are outside the scope of this document, and we will provide you with a separate Client Disclosure Document with respect to such arrangements.
- Where we facilitate indirect clearing services provided by you, for any of your clients that have opted for a Basic Omnibus Indirect Client Account and that are not part of our group, we may enter into a principal-to-principal transaction with an affiliate clearing broker, which is a member of such CCP, instead of a transaction directly with such CCP, in a long chain arrangement under the Indirect Clearing RTS (a **Long Chain Arrangement**). Under a Long Chain Arrangement, both the affiliate clearing broker and we would be subject to the relevant requirements for clearing brokers in the Indirect Clearing RTS. Consequently, any references in this document to 'clearing broker' should be read, where relevant, as including us in the capacity of a client of an affiliate clearing broker under a Long Chain Arrangement.

What if you want to transfer your Client Transactions to another clearing broker?

There may be circumstances in which you wish to transfer some or all of your Client Transactions to another clearing broker on a business as usual basis (i.e. in the absence of us having been declared

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

in default by a CCP). We are not obliged to facilitate this under EMIR or the Indirect Clearing RTS but we may be willing to do so subject to our ability to transfer the CCP Transactions to which they relate and the margin provided to the CCP in connection with them (which will depend on the relevant CCP's rules) and any conditions set out in our client clearing agreement. You will also need to find a clearing broker that is willing to accept such Client Transactions and the related CCP Transactions and assets.

It may be easier to transfer Client Transactions and CCP Transactions that are recorded in an Individual Client Account than those recorded in an Omnibus Client Account (both types of account being described in more detail in Part One B) for the same reasons as set out below under "Will the CCP Transactions and assets relating to you be automatically ported to a back-up clearing broker?". Similarly, where applicable, it may be easier to transfer Client Transactions relating to your Indirect Client Transactions and the corresponding CCP Transactions that are recorded in a Gross Omnibus Indirect Client Account than those recorded in a Basic Omnibus Indirect Client Account (both types of account being described in more detail in Part One B) for the same reasons as set out below under "Will the CCP Transactions and assets relating to you be automatically ported to a back-up clearing broker?".

What happens if we are declared to be in default by a CCP?

If we are declared to be in default by a CCP, there are two possibilities with respect to the CCP Transactions and assets related to you and, where applicable, your clients:

- with respect to Individual Client Accounts, Omnibus Client Accounts and Gross Omnibus Indirect Client Accounts (and, in certain circumstances, Basic Omnibus Indirect Client Accounts), the CCP will, at your request, try to transfer (port) to another clearing broker (a **back-up clearing broker**), such CCP Transactions and assets; or
- if porting cannot be achieved with respect to such accounts and ordinarily with respect to Basic Omnibus Indirect Client Accounts, the CCP will terminate the CCP Transactions that relate to you or your clients, respectively (see "What happens if porting is not achieved" below).

The porting process will differ depending on the CCP but it is likely to involve a close-out (with us) and a re-establishment (with the back-up clearing broker) of the CCP Transactions or a transfer of the open CCP Transactions and related assets from us to the back-up clearing broker. In some cases CCPs will support this structure legally by requiring us to grant a security interest to you over some or all of our related rights against the CCP but in other cases where CCPs can rely on EMIR and local legislation, this is not necessary.

Will the CCP Transactions and assets relating to you and, where applicable, your clients be automatically ported to a back-up clearing broker?

No, there will be a number of conditions which must be satisfied before the CCP Transactions and assets that relate to you and, where applicable, your clients can be ported to a back-up clearing broker. These conditions will be set by the CCPs and will include obtaining your consent. In all cases you will need to have a back-up clearing broker that has agreed to accept the CCP Transactions. You may wish to appoint a back-up clearing broker upfront as part of your clearing arrangements but the back-up clearing broker is unlikely to be able to confirm that it is willing to accept the CCP Transactions until the default occurs. The back-up clearing broker may also have conditions that it requires you to meet. You may also be able to agree with the CCP that it may choose a back-up clearing broker on your behalf. If you have not appointed a back-up clearing broker prior to our default, or agreed with the CCP that it may appoint one on your behalf, then this may mean that porting is less likely to occur.

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

If porting is achieved, your Client Transactions with us will terminate, but we would expect that any Indirect Client Transactions between you and your clients would be unaffected. We would expect your back-up clearing broker to put in place new client transactions between itself and you.

The type of account and level of segregation will have an impact on the ability to port CCP Transactions and assets to a back-up clearing broker upon our default.

With regard to a Basic Omnibus Indirect Client Account (described in more detail in Part One B), no contractual arrangements will be in place for porting and, therefore, porting will ordinarily not be available. With regard to an Omnibus Client Account (described in more detail in Part One B), in most cases all of our clients who have CCP Transactions and assets relating to them recorded in the same Omnibus Client Account will have to agree to use the same back-up clearing broker, and the back-up clearing broker will have to agree to accept all of the CCP Transactions and assets recorded in that Omnibus Client Account. It is therefore likely to be difficult to achieve porting in relation to an Omnibus Client Account or a Basic Omnibus Indirect Client Account.

It should be easier to achieve porting in respect of your positions if you choose an Individual Client Account (described in more detail in Part One B), because you can appoint a back-up clearing broker with respect to just your CCP Transactions and the related assets. Similarly, it should be easier to achieve porting in respect of one of your client's positions if such client chooses a Gross Omnibus Indirect Client Account (described in more detail in Part One B), because it allows one or more of your clients in the same Gross Omnibus Indirect Client Account to port independently of your other clients in the same Gross Omnibus Indirect Client Account, and because, unlike a Basic Omnibus Indirect Client Account, the Gross Omnibus Indirect Client Account at the CCP level relates only to your clients (and not to clients of our other clients).

What happens if porting is not achieved?

Each CCP is permitted to specify a period of time after which, if it has not been able to achieve porting, it will be permitted to actively manage its risks in relation to the CCP Transactions. This period of time will vary across CCPs. If you want to port your CCP Transactions (where possible), you will need to notify the CCP and show that you can satisfy the other conditions within this period.

Otherwise, the CCP will terminate the CCP Transactions and perform a close-out calculation in respect of them in accordance with the CCP rules. If there is an amount owed by the CCP in respect of the CCP Transactions, to the extent that the CCP knows your identity and how much of that amount relates to you and, where applicable, your clients, the CCP may pay such amount directly to you. If the CCP does not know your identity and/or does not know how much of the amount relates to you and, where applicable, your clients, the CCP will pay it to us (or our insolvency practitioner) for the account of our clients.

It is more likely that a CCP will be able to pay any such amount directly to you with respect to an Individual Client Account or a Gross Omnibus Indirect Client Account (described in more detail in Part One B). This is because your identity will typically be disclosed to the CCP in these cases.

If the CCP terminates the CCP Transactions, then the Client Transactions between us and the Indirect Client Transactions between you and your clients are also likely to terminate. The termination calculations in respect of those Client Transactions and Indirect Client Transactions will be performed in accordance with the client clearing agreement between you and us and, where applicable, the indirect client clearing agreement between you and your clients, respectively. Such calculations will likely mirror those performed by the CCP in respect of the CCP Transactions. If you are due a payment from us as a result of the close-out calculations in respect of our Client Transactions, the amount due from us to you will be reduced by any amount that you receive (or are deemed to receive) directly from the CCP.

Please see Part One C for a consideration of the main insolvency considerations.

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

Part One B: Account types and the factors to consider

The types of accounts available

Unless specifically stated otherwise, reference to accounts means the accounts in the books and records of each CCP. The CCP uses these accounts to record the CCP Transactions that we enter into in connection with the clearing of your related Client Transactions and any related Indirect Client Transactions and the assets that we provide to the CCP in respect of such CCP Transactions. Additionally, we will open accounts in our books and records to record the Client Transactions we enter into with you, some of which may relate to your Indirect Client Transactions (depending on the account type), and the assets that you provide to us in respect of such Client Transactions.

There are two basic types of client account available at the CCP level – the Omnibus Client Account and the Individual Client Account. Additionally, there are two basic types of indirect client accounts available at the CCP level – the Basic Omnibus Indirect Client Account and the Gross Omnibus Indirect Client Account.

As noted, we refer you to the CCP disclosures which CCPs are required to prepare and which set out the treatment of margin and collateral at CCP level. We have also included below a general overview of the most common segregation approaches taken by CCPs, but note that for any particular CCP, there is no substitute for that CCP's own disclosure.

At the clearing broker level, we then open and maintain accounts corresponding to the relevant direct and indirect clearing accounts at the CCP level as described in more detail below.

Omnibus Client Account

Under this account type, at the level of the CCP, the CCP Transactions and assets that relate to them in the CCP's accounts are segregated from:

- any CCP Transactions (including corresponding assets in the CCP's accounts) we are clearing for our own account (our **House Transactions**) at the CCP;
- any CCP Transactions (including corresponding assets in the CCP's accounts) relating to any of our other clients that have opted for an Individual Client Account; and
- any CCP Transactions (including corresponding assets in the CCP's accounts) relating to your clients and any clients of our other clients (regardless of whether they have opted for a Basic Omnibus Indirect Client Account or a Gross Omnibus Indirect Client Account).

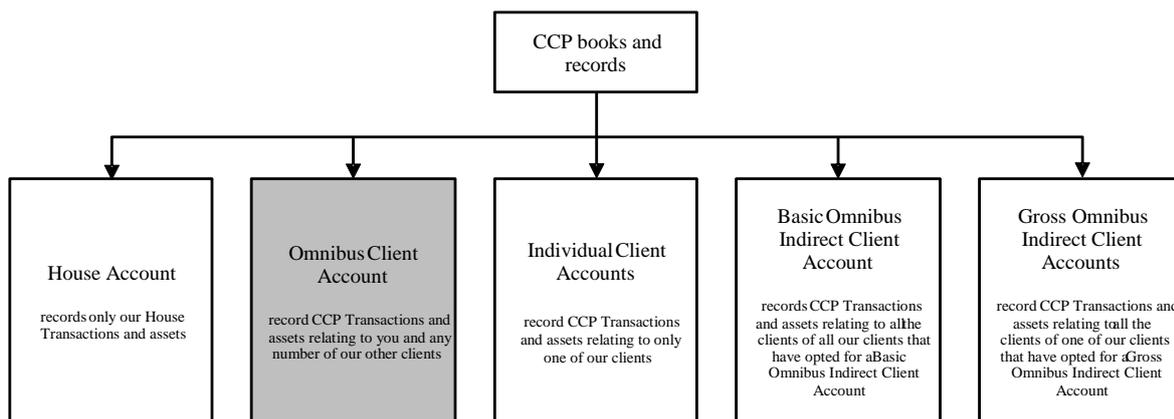

However, the CCP Transactions and assets that relate to you will be commingled with the CCP Transactions and assets relating to any of our other clients that are recorded in the same Omnibus Client Account.

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

Can CCP Transactions and related collateral be netted with our House Transactions and assets?	No
Can CCP Transactions and related assets be netted with those relating to our other clients?	Yes (provided the other clients' CCP Transactions and assets are recorded in the same Omnibus Client Account)
Can CCP Transactions and related collateral be netted with those relating to your clients?	No
Can CCP Transactions and related collateral be netted with those relating to clients of our other clients?	No

The CCP will agree not to net the CCP Transactions relating to you with our House Transactions or any CCP Transactions not recorded in the same Omnibus Client Account, nor use the assets relating to such CCP Transactions with respect to any House Transaction or CCP Transaction recorded in any other account.

However, both we and the CCP may net the CCP Transactions that are recorded in the same Omnibus Client Account. The assets provided in relation to the CCP Transactions recorded in the same Omnibus Client Account can be used in relation to any CCP Transaction (whether it relates to you or to any of our other clients) credited to that Omnibus Client Account.

Please see Part Two for an overview of the risks you may face if you choose an Omnibus Client Account and for details of the different levels of segregation that may be available at different CCPs.

Individual Client Account

Under this account type, at the level of the CCP, the CCP Transactions and assets that relate to you in the CCP's accounts are segregated from:

- any CCP Transactions (including corresponding assets in the CCP's accounts) relating to our House Transactions;
- any CCP Transactions (including corresponding assets in the CCP's accounts) relating to any of our other clients (regardless of whether they have opted for an Individual Client Account or an Omnibus Client Account); and

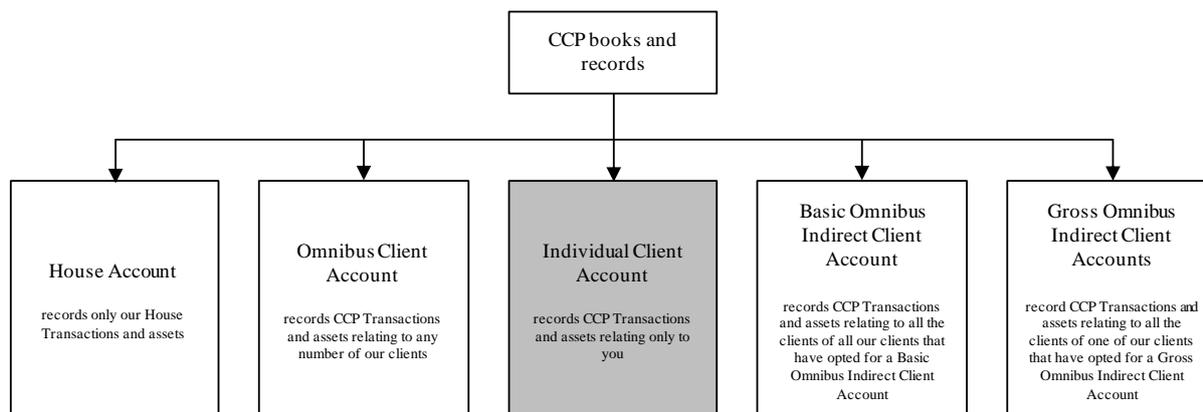

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

- any CCP Transactions (including corresponding assets in the CCP's accounts) relating to your clients and any clients of our other clients (regardless of whether they have opted for a Basic Omnibus Indirect Client Account or a Gross Omnibus Indirect Client Account).

Can CCP Transactions and related collateral be netted with our House Transactions and assets?	No
Can CCP Transactions and related assets be netted with those relating to our other clients?	No
Can CCP Transactions and related collateral be netted with those relating to your clients?	No
Can CCP Transactions and related collateral be netted with those relating to clients of our other clients?	No

The CCP will agree not to net the CCP Transactions relating to you with our House Transactions, nor use the assets relating to such CCP Transactions in relation to our House Transactions.

Further, and in contrast to an Omnibus Client Account, the CCP will agree not to net the CCP Transactions relating to you that are recorded to an Individual Client Account with any CCP Transaction recorded to any other account, nor use the assets related to such CCP Transactions in relation to the CCP Transactions recorded in any other account.

Please see Part Two for an overview of the risks you may face if you choose an Individual Client Account and additional features of Individual Client Accounts that may be available at different CCPs.

Basic Omnibus Indirect Client Account

Under this account type, at the level of the CCP, the CCP Transactions (including the corresponding assets in the CCP's accounts) relating to your clients that have opted for a Basic Omnibus Indirect Client Account are segregated from:

- any CCP Transactions (including corresponding assets in the CCP's accounts) relating to our House Transactions;

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

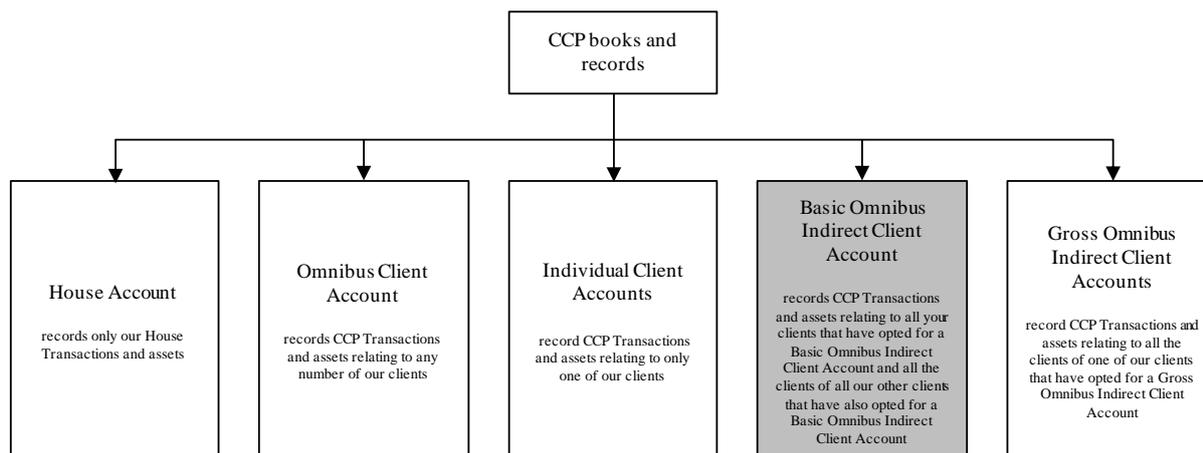

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

- any CCP Transactions (including corresponding assets in the CCP's accounts) relating to your own account or that of one of our other clients (regardless of whether you/they have opted for an Individual Client Account or Omnibus Client Account); and
- any CCP Transactions (including corresponding assets in the CCP's accounts) relating to any of your clients or any clients of our other clients that have opted for a Gross Omnibus Indirect Client Account.

However, the CCP Transactions (including corresponding assets in the CCP's accounts) relating to your clients that have opted for a Basic Omnibus Indirect Client Account will be commingled with the CCP Transactions (including corresponding assets in the CCP's accounts) relating to any of your other clients and any clients of our other clients that have opted for a Basic Omnibus Indirect Client Account and which are recorded in the same Basic Omnibus Indirect Client Account.

Can CCP Transactions and related collateral be netted with our House Transactions and assets?	No
Can CCP Transactions and related assets be netted with those relating to you or our other clients?	No
Can CCP Transactions and related collateral be netted with those relating to your other clients?	Yes (provided your other clients' CCP Transactions and assets are recorded in the same Basic Omnibus Indirect Client Account)
Can CCP Transactions and related collateral be netted with those relating to clients of our other clients?	Yes (provided our other clients' clients' CCP Transactions and assets are recorded in the same Basic Omnibus Indirect Client Account)

The CCP will agree not to net the CCP Transactions relating to your indirect clients that have opted for a Basic Omnibus Indirect Client Account with our House Transactions or any CCP Transactions not recorded in the same Basic Omnibus Indirect Client Account, nor use the assets relating to such CCP Transactions with respect to any House Transaction or CCP Transaction recorded in any other account.

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

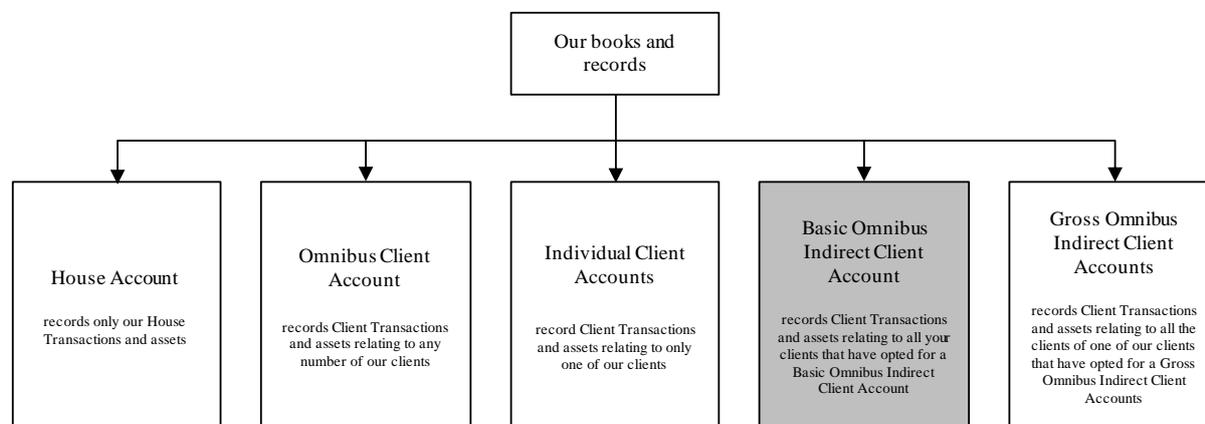

However, both we and the CCP may net the CCP Transactions that are recorded in the same Basic Omnibus Indirect Client Account. The assets provided in relation to the CCP Transactions recorded in the same Basic Omnibus Indirect Client Account can be used in relation to any CCP Transaction (whether it relates to your indirect clients or indirect clients of any of our other clients) credited to that Basic Omnibus Indirect Client Account.

Please see Part Two for an overview of the risks in relation to a Basic Omnibus Indirect Client Account and for details of the different levels of segregation that may be available at different CCPs.

Additionally, at the level of the clearing broker, we then open and maintain accounts corresponding to the Basic Omnibus Indirect Client Accounts at the CCP level. Under this account type, the Client Transactions (including the corresponding assets in our accounts) relating to your clients that have opted for a Basic Omnibus Indirect Client Account are segregated from:

- our House Transactions;
- any Client Transactions (including corresponding assets in our accounts) relating to your own account or that of one of our other clients (regardless of whether you/they have opted for an Indirect Client Account or Omnibus Client Account);
- any Client Transactions (including corresponding assets in our accounts) relating to any clients of our other clients that have also opted for a Basic Omnibus Indirect Client Account and which are recorded in a different Basic Omnibus Indirect Client Account; and
- any Client Transactions (including corresponding assets in our accounts) relating to any of your clients or any clients of our other clients that have opted for a Gross Omnibus Indirect Client Account.

However, the Client Transactions (including corresponding assets in our accounts) relating to your clients that have opted for a Basic Omnibus Indirect Client Account will be commingled with the Client Transactions (including corresponding assets in our accounts) relating to any of your other clients that have also opted for a Basic Omnibus Indirect Client Account and which are recorded in the same Basic Omnibus Indirect Client Account.

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

Can Client Transactions and related collateral be netted with our House Transactions and assets?	No
Can Client Transactions and related assets be netted with those relating to you or our other clients?	No
Can Client Transactions and related collateral be netted with those relating to your other clients?	Yes (provided your other clients' Client Transactions and assets are recorded in the same Basic Omnibus Indirect Client Account)
Can Client Transactions and related collateral be netted with those relating to clients of our other clients?	No

We will not net the Client Transactions relating to your clients that have opted for a Basic Omnibus Indirect Client Account with our House Transactions or any Client Transactions not recorded in the same Basic Omnibus Indirect Client Account, nor use the assets relating to such Client Transactions with respect to any House Transaction or Client Transaction recorded in any other account.

However, we may net the Client Transactions that are recorded in the same Basic Omnibus Indirect Client Account. The assets provided in relation to the Client Transaction credited to that Basic Omnibus Indirect Client Account can be used in relation to any Client Transaction credited to that Basic Omnibus Indirect Client Account.

Gross Omnibus Indirect Client Account

Under this account type, at the level of the CCP, the CCP Transactions (including the corresponding assets in the CCP's accounts) relating to your clients that have opted for a Gross Omnibus Indirect Client Account are segregated from:

- any CCP Transactions (including corresponding assets in the CCP's accounts) relating to our House Transactions;
- any CCP Transactions (including corresponding assets in the CCP's accounts) relating to your own account or that of one of our other clients (regardless of whether you/they have opted for an Individual Client Account or Omnibus Client Account);
- any CCP Transactions (including corresponding assets in the CCP's accounts) relating to any of your clients or any clients of our other clients that have opted for a Basic Omnibus Indirect Client Account; and
- any CCP Transactions (including corresponding assets in the CCP's accounts) relating to any clients of our other clients that have also opted for a Gross Omnibus Indirect Client Account and which are recorded in a different Gross Omnibus Indirect Client Account.

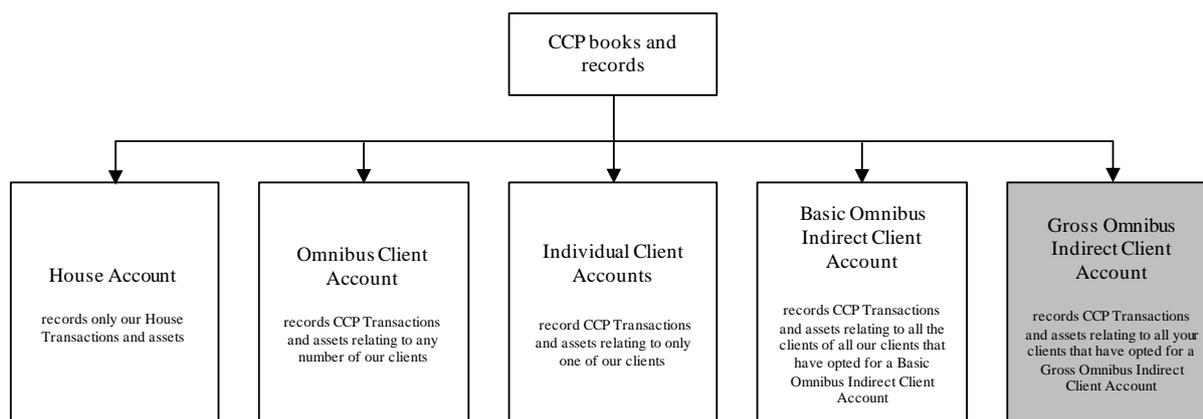

However, the CCP Transactions (including corresponding assets in the CCP's accounts) relating to your indirect clients that have opted for a Gross Omnibus Indirect Client Account will be commingled with the CCP Transactions (including corresponding assets in the CCP's accounts) relating to any of your other clients that have opted for a Gross Omnibus Indirect Client Account and which are recorded in the same Gross Omnibus Indirect Client Account. Within the Gross Omnibus Indirect Client Account, the CCP will keep separate records of the positions of each of your clients that has opted for a Gross Omnibus Indirect Client Account. The CCP will also calculate the margining requirement separately for each of your clients that has opted for a Gross Omnibus Indirect Client Account and collect the aggregate of each such margin requirement.

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

Can CCP Transactions and related collateral be netted with our House Transactions and assets?	No
Can CCP Transactions and related assets be netted with those relating to you or our other clients?	No
Can CCP Transactions and related collateral be netted with those relating to your other clients?	The CCP Transactions relating to any one of your clients that has opted for a Gross Omnibus Indirect Client Account will not be netted with the CCP Transactions relating to any of your other clients. However, the collateral of any one of your clients that has opted for a Gross Omnibus Indirect Client Account may be used to cover CCP Transactions of your other clients to the extent it is recorded in the same Gross Omnibus Indirect Client Account.
Can CCP Transactions and related collateral be netted with those relating to clients of our other clients?	No

The CCP will agree not to net the CCP Transactions relating to your clients that have opted for a Gross Omnibus Indirect Client Account with our House Transactions, your CCP Transactions, the CCP Transactions relating to our other clients or any CCP Transactions relating to your other clients (regardless of whether they are recorded in the same Gross Omnibus Indirect Client Account).

The CCP will also agree not to use the assets relating to the CCP Transactions relating to your clients that have opted for a Gross Omnibus Indirect Client Account with respect to any House Transactions, your CCP Transactions, the CCP Transactions relating to our other clients or any CCP Transactions relating to your other clients provided that they are not recorded in the same Gross Omnibus Indirect Client Account. However, the assets provided in relation to the CCP Transactions relating to one of your clients that have opted for a Gross Omnibus Indirect Client Account may be used by both the CCP and us in relation to any CCP Transaction relating to your other clients that have also opted for a Gross Omnibus Indirect Client Account.

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

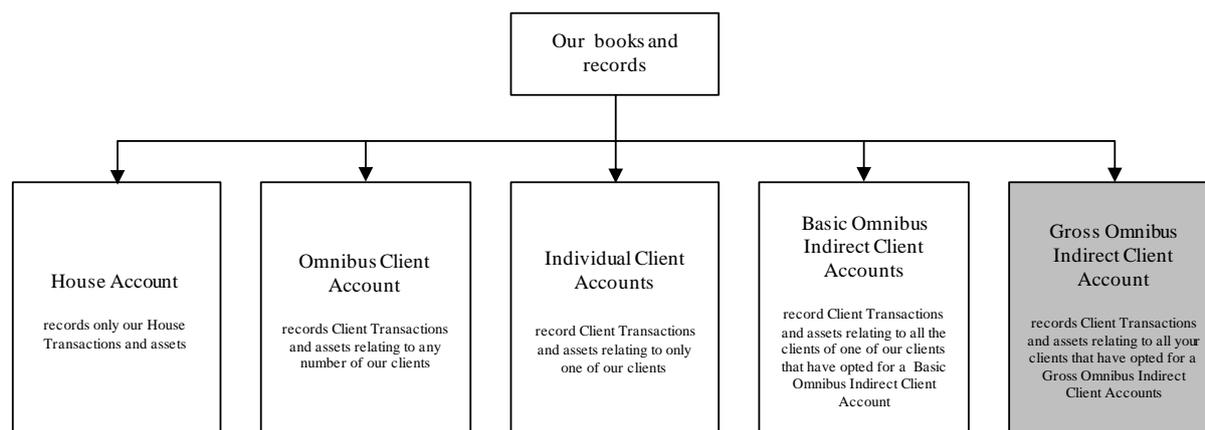

Please see Part Two for an overview of the risks in relation to a Gross Omnibus Indirect Client Account and for details of the different levels of segregation that may be available at different CCPs.

Additionally, at the level of the clearing broker, we then open and maintain accounts corresponding to the Gross Omnibus Indirect Client Accounts at the CCP level. Under this account type, the Client Transactions (including the corresponding assets in our accounts) relating to your clients that have opted for a Gross Omnibus Indirect Client Account are segregated from:

- our House Transactions;
- any Client Transactions (including corresponding assets in our accounts) relating to your own account or that of one of our other clients (regardless of whether you/they have opted for an Individual Client Account or Omnibus Client Account);
- any Client Transactions (including corresponding assets in our accounts) relating to any of your clients or any clients of our other clients that have opted for a Basic Omnibus Indirect Client Account; and
- any Client Transactions (including corresponding assets in our accounts) relating to any clients of our other clients that have also opted for a Gross Omnibus Indirect Client Account and which are recorded in a different Gross Omnibus Indirect Client Account.

However, the Client Transactions (including corresponding assets in our accounts) relating to your clients that have opted for a Gross Omnibus Indirect Client Account will be commingled with the Client Transactions (including corresponding assets in our accounts) relating to any of your other clients that have also opted for a Gross Omnibus Indirect Client Account and which are recorded in the same Gross Omnibus Indirect Client Account.

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

Can Client Transactions and related collateral be netted with our House Transactions and assets?	No
Can Client Transactions and related assets be netted with those relating to you or our other clients?	No
Can Client Transactions and related collateral be netted with those relating to your other clients?	The Client Transactions relating to any one of your clients that has opted for a Gross Omnibus Indirect Client Account will not be netted with the Client Transactions relating to any of your other clients. However, the collateral of any one of your clients that has opted for a Gross Omnibus Indirect Client Account may be used to cover Client Transactions of your other clients to the extent it is recorded in the same Gross Omnibus Indirect Client Account
Can Client Transactions and related collateral be netted with those relating to clients of our other clients?	No

We will not net the Client Transactions relating to your clients that have opted for a Gross Omnibus Indirect Client Account with our House Transactions, your Client Transactions, the Client Transactions relating to our other clients or any Client Transactions relating to your other clients (regardless of whether they are recorded in the same Gross Omnibus Indirect Client Account).

Neither will we use the assets relating to the Client Transactions relating to your clients that have opted for a Gross Omnibus Indirect Client Account with respect to any House Transactions, your Client Transactions, the Client Transactions relating to our other clients or any Client Transactions relating to your other clients provided that they are not recorded in the same Gross Omnibus Indirect Client Account. However, we may use the assets provided in relation to the Client Transactions relating to one of your clients that have opted for a Gross Omnibus Indirect Client Account in relation to any Client Transaction relating to your other clients that have also opted for a Gross Omnibus Indirect Client Account.

Other factors that may impact on the level of protection you receive in respect of assets that you provide to us as margin for Client Transactions

There are a number of factors that, together, determine the level of protection you will receive in respect of assets that you provide to us as margin for Client Transactions:

- whether you choose an Omnibus Client Account or an Individual Client Account and whether your clients choose a Basic Omnibus Indirect Client Account or a Gross Omnibus Indirect Client Account (as discussed under "The types of accounts available" above);
- whether, if you choose an Omnibus Client Account, the account is margined on a gross or net basis;
- in each case, the fact that such assets are transferred by way of title transfer rather than under a security interest;

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

- the fact that cash that you transfer to us will be transferred by way of title of transfer and therefore will not be treated as client money in accordance with the FCA client money rules;
- whether we call any excess margin from you or you pay excess margin to us;
- whether you will get back the same type of asset as you provided as margin;
- the bankruptcy and other laws that govern us and the CCP; and
- whether you are comfortable that accounts of our affiliates may also be part of the same Omnibus Client Account as you.

The rest of Part One B sets out further details for each of these variables and their implications under English Law.

Will your account be margined on a gross or net basis?

Prior to the Indirect Clearing RTS coming into force, the CCPs are only required to offer one type of Omnibus Client Account (and one type of Individual Client Account) with regard to direct clearing under EMIR, but some of them have developed a range of accounts within these two types with features that provide different degrees of segregation. There are two main levels of segregation within Omnibus Client Accounts:

- Net is where the margin called by the CCP in respect of the CCP Transactions is called on the basis of the net CCP Transactions recorded in the Omnibus Client Account.
- Gross is where the margin called by the CCP Transactions is called on the basis of the gross CCP Transactions recorded in the Omnibus Client Account.

These two different versions of the Omnibus Client Account are reflected in the two indirect client accounts required under the Indirect Clearing RTS, which envisage one gross omnibus account in the form of the Gross Omnibus Indirect Client Account and one omnibus account that may be net in the form of the Basic Omnibus Indirect Client Account.

It may be easier to port CCP Transactions and their related assets, both in business as usual and default circumstances, if your Omnibus Client Account is margined on a gross basis. This is because the CCP is more likely to have sufficient assets to facilitate the porting of the CCP Transactions that relate to you or, where applicable, your clients and those that relate to another client or, where applicable, their clients if it has called the margin on a gross basis. That said, different CCPs' accounts have been designed in different ways and so you should consider each CCP's information about its specific accounts to understand the exact differences. Please see Part Two for more details on this.

Will you provide cash or non-cash assets as margin for the Client Transactions?

As noted under "*The "principal-to-principal" clearing model*" in Part One A, as a clearing member of the CCP, we are required to transfer assets as margin to the CCP in respect of the CCP Transactions related to your Client Transactions and any Indirect Client Transactions. CCPs only accept certain types of liquid cash and non-cash assets as margin.

As is market practice, we will decide what types of assets to accept from you as margin for your Client Transactions. This will be set out in the client clearing agreement between us. What we will accept from you as margin for the Client Transactions will not necessarily be the same type of assets that the CCPs will accept from us for the CCP Transactions, in which case we may provide you with a collateral transformation service, under which we transform the assets you provide to those which we can pass on to the CCP.

You provide assets to us on a title transfer rather than a security interest basis

Title Transfer

The client clearing agreement provides for the transfer of assets by way of title transfer. Therefore, when you transfer assets (**Transferred Assets**) to us we become the full owner of such assets and you lose all rights in such assets. We will record in our books and records that we have received such Transferred Assets from you with respect to the applicable Client Transaction. We will be obliged to deliver to you equivalent assets to such Transferred Assets (**Equivalent Assets**) when contractually due.

We may either transfer such Transferred Assets on to the CCP with respect to the CCP Transaction related to the Client Transaction or any Indirect Client Transaction, or we may transfer other assets to the CCP with respect to such CCP Transaction.

You bear our credit risk with respect to our obligation to deliver Equivalent Assets to you. This means that if we were to fail, unless we are declared to be in default by the CCP, you will have no right of recourse to the CCP or to any assets that we transfer to the CCP and you will instead have a claim against our estate for a return of the assets along with all our other general creditors. Even if we are declared to be in default by the CCP, the extent of your rights in relation to the CCP, if any, will depend on the particular CCP.

Security Interest

If your client clearing agreement with a clearing member were to provide for the transfer of assets by way of security interest, when you transferred assets to the clearing member, you would retain full beneficial ownership of such assets. Such assets would be transferred to the clearing member on the basis that the assets still belonged to you, but you had granted the clearing member a security interest with respect to such assets.

The clearing member might enforce that security interest if you defaulted in your obligations to the clearing member. Absent the exercise of any right of use by the clearing member (see below), only at the point of such enforcement would title in such assets or their liquidation value transfer to the clearing member. The clearing member would record in its books and records that it had received such assets from you with respect to the applicable Client Transaction.

Prior to any such default, you might also give the clearing member a right to use such assets. Until such time as the clearing member exercised such right of use, the assets would continue to belong to you. Once the clearing member exercised the right of use, (e.g. by posting the assets to a CCP), the assets would cease to belong to you and in effect become the clearing member's asset, at which point you would bear the clearing member's credit risk in a similar way to a title transfer arrangement. The circumstances in which the clearing member might exercise such right of use and the purposes for which it might use any assets would be set out in the client clearing agreement between you and the clearing member.

As discussed above, you should note that this discussion of the transfer of assets by way of security interest is not applicable to any cash collateral transferred by you to us on the title transfer basis.

How would client money treatment in accordance with the FCA client money rules differ from title transfer?

Our regulator, the Financial Conduct Authority, approves several regimes for the treatment of clients' collateral, of which the receipt of collateral on the title transfer basis and the receipt of collateral as "client money" in accordance with the Financial Conduct Authority's client money rules are applicable to us. We accept cash collateral on the title transfer basis only (as detailed in "You provide assets to

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

us on a title transfer rather than a security interest basis" above) and do not offer client money treatment. You should carefully assess if title transfer treatment is suitable for you.

Client money treatment is intended to provide enhanced protection of a client's money in the event of the insolvency of its clearing member. Client money is required to be segregated from the clearing member's own money and held by it as trustee for the client so that, in the event of the clearing member's insolvency, the segregated money will not be available to creditors who do not receive client money treatment.

This difference between client money treatment and title transfer is separate to the question of what level of segregation you want and results from the FCA's client money regime rather than EMIR or the Indirect Clearing RTS.

If a client's cash is held as client money then the client's choice of account type could impact how any cash balance returned to its clearing member (or the clearing member's insolvency practitioner) on the default of the clearing member is treated.

If the clearing member is declared to be in default by a CCP, and the CCP cannot port or return the balance to the client directly and the balance has instead to be returned to the clearing member (or its insolvency practitioner) for the account of its clients (see *"What happens if porting is not achieved"* in Part One A above), there are some important differences in how the FCA client money rules would apply:

- If the client had selected an Individual Client Account, then to the extent that any cash was paid to the clearing member by the CCP for the client's account, it would not form part of the client money pool and will instead be distributed to the client.

The client money pool is the mechanism through which the clearing member's insolvency practitioner would normally gather together the client money relating to most of the clients for which the clearing member holds client money, wherever it is held, and from which it would distribute that client money in accordance with the FCA client money rules.

- If the client had selected an Omnibus Client Account, Basic Omnibus Indirect Client Account or Gross Omnibus Indirect Client Account then any cash paid to the clearing member by the CCP for the account of its clients would be likely to form part of the client money pool and be subject to the normal client money rules on distribution. However, there may be some exceptions to this, including where (a) the clearing member does not hold any excess margin (see under *"How will any excess margin we call from you be treated?"* below) in relation to the relevant account and (b) the CCP can tell the clearing member how the money paid to the clearing member should be allocated between the clients in the relevant account.

How will any excess margin we call from you be treated?

We are required to treat excess margin in a particular way in relation to an Individual Client Account. Excess margin is any amount of assets we require from you or you provide to us in respect of a Client Transaction that is over and above the amount of assets the CCP requires from us in respect of the related CCP Transaction.

If you choose an Individual Client Account we are required to pass all excess margin related to a Client Transaction on to the CCP with which we have entered the related CCP Transaction. If you provide us with assets which are not related to your individually segregated clearing activities at a particular CCP and such assets are not dedicated to cover your current positions with that CCP, then we do not need to post such assets on to that CCP. Also, if the excess margin you provide to us is not in the form of assets which are eligible to be posted to the CCP (in accordance with the CCP's rules), unless we agree otherwise, we have no obligation to transform such assets into assets that would be eligible to be posted to the CCP.

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

In relation to an Omnibus Client Account, a Basic Omnibus Indirect Client or a Gross Omnibus Indirect Client Account, we are not required to pass any excess margin on to the CCP. Depending on the terms on which we hold excess margin, you may take credit risk on us in respect of it.

Will you get back the same type of asset as you originally provided to us as margin for a Client Transaction?

In a business as usual situation, whether we will deliver the same type of asset to you that you originally provided to us will be governed by the client clearing agreement between us.

In the event of our default, if you are due a payment, you may not receive back the same type of asset that you originally provided to us. This is because the CCP is likely to have wide discretion to liquidate and value assets and make payments in various forms, and also because the CCP may not know what form of asset you originally provided to us as margin for the Client Transaction and as a result of any asset transformation services we may provide. This risk is present regardless of what type of client account you select.

Please see Part One C for a consideration of the main insolvency considerations.

What is the impact if we provide you with margin waiver facilities?

As set out in the client clearing agreement between you and us, we may offer you a margin waiver facility. Under such margin waiver facility we may have agreed that, instead of asking you immediately to provide us with all of the margin required for a CCP Transaction, we will fund such margin requirement out of our own funds. In the event of our default, the CCP will still treat such margin as relating to you, and will either port this to your new clearing broker or return it to you or to us for your account (please see *“What happens if we are declared to be in default by a CCP?”* above). However, even in the event of our default, you will still be obliged to repay to us any amounts outstanding under the margin waiver facility made available to you, subject to any applicable rights of set-off.

What is the impact if you have given a security interest to a third party over your account?

You may have given a security interest to a third party over the accounts relating to you maintained in our books and records. Provided that the security interest you have granted has not become enforceable by the third party this should not impact on the ability to either port or return assets to you or to us for your account in the event of our default (please see *“What happens if we are declared to be in default by a CCP?”* above). It is your responsibility to review the extent of any security interest you have granted to any third party and to understand in what circumstances any such security interest will become enforceable. You should also notify any entity to which you have granted such security that it may want to confirm the validity of the security following the changes to your account which are required by EMIR. It is possible that some CCPs may have rules concerning the extent to which such security interests may be granted. If this is the case, we may not be able to use such tripartite agreements in relation to Client Transactions cleared through those CCPs.

How will we treat our affiliates and how may this affect our other clients?

Except for Long Chain Arrangements, we treat our affiliates in the same way as clients when complying with EMIR and the Indirect Clearing RTS. Consequently, we must segregate affiliate positions from our house positions. Our affiliates will also have a choice between an Individual Client Account and an Omnibus Client Account. There is no requirement under EMIR for us to segregate CCP Transactions and assets which relate to our affiliates from CCP Transactions and assets which relate to our non-affiliated clients, so if an affiliate chooses an Omnibus Client Account, it may be part of the same Omnibus Client Account as other clients.

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

If you are not our affiliate and you choose an Omnibus Client Account with us, this account may contain CCP Transactions and assets which relate to each of you, our affiliates and other non-affiliated clients. Accordingly you may face the risk of a correlated default where both we and an affiliate simultaneously default (see below).

The main potential risk of recording CCP Transactions and assets which relate to our affiliates in the same Omnibus Client Account as those which relate to our non-affiliated clients is as follows:

- If one or more of our affiliates cannot pay a margin call upon request from us and therefore defaults, we will still be required to post such amount to the CCP. We would typically pay such amount to the CCP out of our own funds and later try to reclaim the relevant amount from the affiliate(s).
- In a worst case scenario where we are also in default (correlated default), we may not have available funds to satisfy the relevant margin call(s), which could lead to a margin shortfall in the Omnibus Client Account. This would occur if and to the extent that the eventual cost of closing out the CCP Transactions corresponding to affiliate Client Transactions is not covered by the portion of the margin in the Omnibus Client Account corresponding to the relevant affiliate Client Transactions.
- If, upon our default, there is margin shortfall in the Omnibus Client Account, it is likely that all the clients (including our affiliates) who have CCP Transactions and assets relating to them recorded in the Omnibus Client Account will share in any losses arising from that shortfall (shortfall event). How such losses will be allocated between clients will be dependent on a number of factors, primarily the relevant CCP rules.

You should note that the consequences of a shortfall event for clients in the Omnibus Client Account (as described above) will be the same if a correlated default occurs with respect to us and one of our non-affiliated clients whose CCP Transactions and assets are also recorded in the Omnibus Client Account.

However, the correlation between the risk of our default and the risk of default of our affiliates will be different from the correlation between the risk of our default and the risk of default of our non-affiliated clients, and may be higher. You may therefore perceive the risk of a correlated default occurring, leading to a shortfall event occurring in the Omnibus Client Account, each as described above, to be greater with respect to our affiliates than with respect to non-affiliated clients because, for example, non-affiliated clients will not be in the same financial group and may be in different industry sectors from us.

Clients transfer margin to us on a title transfer basis and so have exposure to our credit risk in respect of such margin (see *“You provide assets to us on a title transfer rather than a security interest basis”* and *“How would client money treatment in accordance with the FCA client money rules differ from title transfer?”* above.) The risks described above following a shortfall event (for both affiliate and non-affiliated clients) are incremental to such credit risk.

The Individual Client Account option is available for those clients who do not wish to be part of the same Omnibus Client Account as our affiliates but clients who opt for an Individual Client Account will still have exposure to our credit risk as a result of transferring margin to us on a title transfer basis.

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

Part One C: What are the main insolvency considerations?

General insolvency risks

If we enter into insolvency proceedings, you may not receive all of your assets back or retain the benefit of your positions and there are likely to be time delays and costs (e.g. funding costs and legal fees) connected with recovering those assets. These risks arise in relation to Individual Client Accounts, Omnibus Client Accounts, Basic Omnibus Indirect Client Accounts and Gross Omnibus Indirect Client Accounts because:

- except for CCP-specific porting solutions described earlier and the comments below under "*Margin rights*", you will not have any rights directly against the CCP; and you will only have contractual claims against us (i.e. rather than being able to recover particular assets as owner);
- our insolvency proceedings are most likely to be a version of a process called administration (although it is possible for us to enter into liquidation and other proceedings). In administration, subject to a few exceptions, you will not be able to take any action against us without court or insolvency official consent (which can be a time consuming process with an uncertain outcome);
- any stage of a cleared transaction (e.g. Indirect Client Transactions, Client Transactions, CCP Transactions and porting) may be challenged by our insolvency official if, broadly speaking, it was not on arm's length terms. If successful, the court has broad powers to unwind or vary all of those stages; and
- as you transfer margin by way of title transfer, you will not have a proprietary claim against such margin and in the event of our insolvency would be an unsecured creditor and would have to claim as a general creditor in our insolvency process for any amounts not otherwise recovered.

Please also note that:

- insolvency law may override the terms of contractual agreements, so you should consider the legal framework as well as the terms of disclosures and legal agreements; and
- a large part of your protection comes from CCP arrangements and the legal regimes surrounding them. Therefore, you should understand these in order to evaluate the level of protection that you have on our default. It is important that you review the relevant disclosures by the CCP in this respect.

Insolvency of CCPs and others

Except as set out in this section "*Insolvency of CCPs and others*", this disclosure deals only with our insolvency.

You may also not receive all of your assets back or retain the benefit of your positions if other parties in the clearing structure default – e.g. the CCP itself, a custodian or a settlement agent.

In relation to CCP insolvency, broadly speaking our (and therefore your) rights will depend on the law of the country in which the CCP is incorporated (i.e. not necessarily English law) and the specific protections that the CCP has put in place. You should review the relevant CCP disclosures carefully in this respect and take legal advice to fully understand the risks in this scenario.

In addition, please note the following:

- we expect that an insolvency official will be appointed to manage the CCP. Our rights against the CCP will depend on the relevant insolvency law and/or that official;

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

- it will be difficult or impossible to port CCP Transactions and related margin, so it would be reasonable to expect that they will be terminated at CCP level. The steps, timing, level of control and risks relating to that process will depend on the CCP, its rules and the relevant insolvency law. However, it is likely that there will be material delay and uncertainty around when and how much assets or cash we will receive back from the CCP. Subject to the bullet points below, it is likely that we will receive back only a percentage of assets available depending on the overall assets and liabilities of the CCP;
- it is unlikely that you will have a direct claim against the CCP because of the principal-to-principal model described in Part One A;
- under the client clearing agreement, Client Transactions will terminate at the same time as the matching CCP Transactions unless the relevant CCP rules provide otherwise. This will result in a net sum owing between you and us. However, your claims against us are limited recourse so that you will only receive amounts from us in relation to Client Transactions if we receive equivalent amounts from the CCP in relation to relevant CCP Transactions;
- if recovery of margin in this scenario is important, then you should explore "bankruptcy remote" or "physical segregation" structures offered by some CCPs and clearing members. These tend to be offered only in relation to Individual Client Accounts and generally involve either:
 - you or the clearing member retaining assets in your/the clearing member's name and only giving a security interest over that margin to the CCP (i.e. it allows the CCP to apply margin if the clearing member defaults but should keep the assets out of the CCP's insolvency if it defaults); or
 - the CCP holding the assets in a blocked or controlled margin account and giving a security interest (or similar legal right) over the margin back to the clearing member, to you and/or to a trustee on the clearing member's behalf.

It is beyond the scope of this disclosure to analyse such options but your due diligence on them should include analysis of matters such as whether other creditors of the type described in "*Porting – preferential creditors*" below will have priority claims to margin; whether margin or positions on one account could be applied against margin or positions on another account (notwithstanding the contractual agreement in the CCP's rules); the likely time needed to recover margin; whether the margin will be recovered as assets or cash equivalent; and any likely challenges to the legal effectiveness of the structure (especially as a result of the CCP's insolvency). Please note that, as we take margin on a title transfer basis, we do not offer such structures.

Margin rights

As you transfer margin by way of title transfer, you will not have a proprietary claim against such margin and in the event of our insolvency would be an unsecured creditor and would have to claim as a general creditor in our insolvency process for any amounts not otherwise recovered.

If you were to provide assets to a clearing member by way of security interest and the clearing member had not exercised a right of use over those assets, then you should have a legal right to recover the balance of those assets (after settling your obligations to the clearing member) ahead of other creditors. However, please note that, depending on the exact set up of the relevant security arrangements, it may be that some preferential creditors would still have a prior claim to your assets (*please see "Porting – preferential creditors" below which deals with a similar point*).

If you were to retain the assets (e.g. in a custody account over which you had given a clearing member a security interest, as discussed in the final bullet point of "*Insolvency of CCPs and others*" above) then you would have the best chance of recovering them. If you had transferred the assets to the clearing member's name by way of security (e.g. by giving the clearing member a mortgage over

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

the assets) then you would bear more risk if there was a shortfall in any of the assets that the clearing member was holding.

Generally speaking, your risk of loss will be highest in relation to non-client money (i.e. title transfer) cash margin; lower in relation to securities held by the clearing member in an omnibus account; and lower still if securities are segregated in the clearing member's books and records and at custody level identifying you as the client.

The actual result will be highly fact-specific and will depend on, amongst other things, the exact terms of the relevant legal arrangements; how the clearing member has operated accounts; and claims that other intermediaries (e.g. custodians and settlement systems) have to those assets.

We do not expect the above position to change materially if you have an Individual Client Account, Omnibus Client Account, Basic Omnibus Indirect Client Account or Gross Omnibus Indirect Client Account.

Companies Act 1989, Part VII

Part VII applies because we are an English company (generally speaking, it does not apply to non-English companies) and gives specific protection against some of the legal risks that arise on our insolvency. Generally speaking, if we are declared to be in default by a CCP that has the benefit of Part VII protection, then our insolvency official cannot challenge actions taken by the CCP against us under its default rules:

- to settle our CCP Transactions or to transfer those CCP Transactions and related assets to a back-up clearing broker; or
- to transfer our Client Transactions with you and related assets to the same back-up clearing broker.

This Part VII protection generally applies to actions taken by English CCPs that have been (re)authorised by the Bank of England. It can also protect actions taken by non-English CCPs that have been authorised or recognised by other competent authorities or the European Securities and Markets Authority, as applicable, provided that the non-English CCP's default provisions either meet certain requirements set out in the UK Recognition Requirements or the non-English CCP has applied for and the Bank has granted an order stating that Part VII will apply to transfers of assets and positions under that non-English CCP's default provisions.

In either case, Part VII focuses on protecting counterparties from our default. It is not clear that it would provide any wider protection, e.g. if the CCP itself became insolvent.

Please note that Part VII is a complex piece of legislation and this summary is not a substitute for detailed legal analysis, particularly of Part VII in the context of the relevant CCPs' regulatory authorisations and default rules, by your professional advisors.

Close-out netting

If we default and the CCP cannot port the CCP Transactions and collateral (e.g. because a back-up clearing broker cannot be found or, ordinarily, because the relevant positions are in a Basic Omnibus Indirect Client Account) then we would expect it to terminate and net our CCP Transactions and apply related assets.

You and we would want this to work differently from normal, bilateral close-out netting that would apply to all positions and assets between us and the CCP. For example, if your assets are credited to an Individual Client Account then you would want to avoid the netting of those assets with our house account or with another client account at the CCP.

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

There is a risk that this netting across accounts could happen automatically as a result of ordinary English insolvency law. However, to the extent that the CCP has Part VII protection, this should not occur.

A similar risk occurs between us and you in relation to Client Transactions.

It is most likely to materialise in a pre-porting period during which English law may automatically set off Client Transactions and collateral relating to one CCP with Client Transactions and collateral relating to another. This risk arises regardless of what you and we may provide for in our clearing documentation. Whilst the resulting termination amount should represent our net exposure to each other, it will make porting difficult or impossible.

It is unclear whether Part VII provides you protection in this case. However, there are certain industry-wide legal opinions that have been prepared on the effectiveness of close-out provisions in standard client clearing agreements. You should seek legal advice and/or access to such opinions for more information in this respect.

Please also note more generally that your freedom to close out Client Transactions is more limited under the client clearing agreement than in other arrangements that you may be used to. In particular, the main termination event under our client clearing agreement is that the relevant CCP has declared us to be in default under the CCP's rules. The intention is to match the treatment of CCP Transactions and Client Transactions as much as possible.

Porting - prohibition

As mentioned above, except in specific (e.g. physically segregated) structures, a CCP only owes us (not you) obligations in relation to CCP Transactions and related assets.

As a result, when these contracts and assets are transferred to a back-up clearing broker, there is a risk of insolvency challenge because our rights have effectively been taken from us on or around the time of our insolvency. Applicable laws may not permit this and there is a risk that the courts may therefore not permit, or may unwind, any porting and related Client Transactions with your back-up clearing broker.

That said, we expect the risk of challenge to be low in relation to CCP Transactions and matching transfer of Client Transactions that are ported in accordance with the default rules of a CCP that has Part VII protection.

Porting - preferential creditors

As mentioned under "*What happens if we are declared to be in default by a CCP?*" in Part One A, a CCP's porting structure may be based on or supported by a security interest. This can take different forms but generally involves us creating security over our rights against the CCP in relation to an Individual Client Account, Omnibus Client account or Gross Omnibus Indirect Client Account in your favour or in favour of another person (e.g. an independent trustee) to hold the security on your behalf. Broadly speaking, the security interest should support the argument that these assets are not part of our insolvency estate (i.e. are not to be shared with our other creditors).

However, depending on the exact structure, insolvency law gives certain statutory creditors priority over secured creditors. This means that some creditors may have a claim on client account assets ahead of you. Statutory creditors are likely to include, amongst others, our insolvency official (e.g. in respect of its costs and expenses), a relatively small amount of unsecured creditors, some employee salaries and pension contributions.

Mismatch of CCP/Client Transactions and assets

Copyright © 2017 by FIA, Inc. FIA, Inc. has not reviewed or endorsed any modifications that may have been made to this document.

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

It could be that our net assets in relation to CCP Transactions do not match our net obligations to each other in relation to the matching Client Transactions. This can slow down or make porting impossible either operationally or legally.

For example, it may occur at CCP level as a result of Fellow Client Risk (see the explanation of this term in Part Two of this document) in an Omnibus Client Account or a Gross Omnibus Indirect Client Account, with the result that there are insufficient assets available for porting to satisfy our obligations to you in relation to the Client Transactions.

Alternatively, it could be that all of your Client Transactions with us are netted automatically as a result of English insolvency law (please see above under "*Close-out netting*").

Part One D: Disclosure of general terms and conditions of Indirect Clearing Arrangements

1. Introduction

In accordance with the provisions of the Indirect Clearing RTS, we are required to disclose the general terms and conditions pursuant to which we provide to our clients indirect clearing services with respect to exchange-traded derivatives contracts that are cleared by a CCP. This document in particular addresses the requirements set in Article 2(1)(b) and Article 4(1) of the Indirect Clearing RTS.

The term “**indirect clearing services**” refers to the circumstances where we are a clearing member of an EU CCP and our direct client is an intermediary with clients of its own who are using our clearing services via that intermediary.

2. Description of general terms and conditions of indirect clearing arrangements

A general description of the principal terms and conditions governing our relationship with our clients to whom we offer indirect clearing services is set out below. The actual terms and conditions are to be set out in detail in the agreement between us, including all schedules and appendices thereto, that we enter into with you for such purposes (the “**Agreement**”). Please note that the specific terms and conditions of the Agreement that we enter into with any client may differ depending on our analysis of the risks that the trading activities of such client, or of the indirect client of such client, may present. We will also take into account normal due diligence considerations, including credit risk issues in deciding whether to make direct clearing services or related indirect clearing services available to any particular person.

Before providing indirect client services to you, we will generally require that you:

- provide us with such information that we may request in order to verify your identity as required by law or as we may otherwise require for account opening purposes.
- confirm to our satisfaction that you are a credit institution (authorised in accordance with Directive 2013/36/EU) or investment firm (authorised in accordance with Directive 2014/65/EU) or an entity established in a third country that would be considered to be a credit institution or investment firm if that entity were established in the European Union.
- confirm to our satisfaction that you provide clearing services to your clients constituting indirect clearing services, on reasonable commercial terms and you have publicly disclosed the general terms and conditions under which you provide those services. These terms should be agreed with us.
- confirm to our satisfaction that you meet our minimum financial resources and operational capacity requirements appropriate for your business, experience and the nature of the trading in which you or your clients intend to engage or for our clearing services which would be provided pursuant to the Agreement. You must agree to provide us with such financial information, including a current financial statement, as we may request from time to time and to notify us promptly of any material change in your financial condition.
- confirm that you will satisfy all requirements applicable to you as a client offering clearing services to your clients under the Indirect Clearing RTS.
- agree to assist us and take such action as we may reasonably require to enable us to identify, monitor and manage any material risks arising from the provision of indirect clearing services that

This document is based on the January 2016 version of the ISDA and FIA Clearing Member

Disclosure Document in which both the International Swaps and Derivatives Association, Inc. and FIA, Inc. have copyright.

could affect our resilience to adverse market developments. We shall establish internal procedures to ensure that this information cannot be used for commercial purposes.

- confirm to our satisfaction that you have established procedures which, following the occurrence of an event of default, will enable you to satisfy your obligations to provide us information about the indirect clients.
- acknowledge that you have read and understood all disclosure statements with respect to your trading activities that we have provided to you, including the appropriate clearing member disclosure document (the “**Clearing Member Disclosure Document**”) which could be found at: https://cib.bnpparibas.com/our-solutions/global-markets_a-34-39.html
- acknowledge that we will not be liable to you or to any of your clients for any losses that may be incurred except insofar as such losses are a direct result of our negligence, wilful default or fraud and, further, that in no event will we be liable for any consequential, direct or indirect losses or liabilities (whether in respect of taxation or otherwise).

In addition, the Agreement would include suitable representations made by you as to capacity and authority and the holding of necessary licences, provisions as to limits which we will set in relation to indirect clearing services, obligations on your part in relation to payments and deliveries due on exchange traded contracts cleared by us for your clients, and events of default and close-out provisions. Please note that this is a non-exhaustive list setting out significant provisions of the Agreement.

3. Fee Disclosures

Details of the costs associated with the different levels of segregation will be discussed before the service is made available to you.

4. Important

This document has been produced to meet the requirements of the Indirect Clearing RTS to disclose the general terms and conditions pursuant to which we provide our clients indirect clearing services with respect to exchange-traded derivatives contracts that are cleared by an EU CCP. Accordingly, these provisions are not intended to constitute or give rise to legally binding rights or obligations on the part of any person. Where we agree to make direct clearing services or related indirect clearing services available to you, the applicable terms and conditions specific to you will be set out in detail in the Agreement. However, this does not constitute an offer to make available direct clearing services or related indirect clearing services to any specific person. The offer of any such services would depend upon normal due diligence considerations.

These general terms and conditions do not constitute legal or any other form of advice and must not be relied on as such. It is your responsibility and, where applicable, the responsibility of your clients to review and conduct independent due diligence on the relevant rules, legal, contractual and other documentation and any other information provided on each of the account offerings and those of the various EU CCPs on which we would clear derivatives for you and your clients pursuant to the Agreement. You and/or your clients may wish to appoint independent professional advisors to assist with this.

We shall not in any circumstances be liable, whether in contract, tort, breach of statutory duty or otherwise for any losses or damages that may be suffered as a result of using this document. Such losses or damages include (a) any loss of profit or revenue, damage to reputation or loss of any contract or other business opportunity or goodwill and (b) any indirect loss or consequential loss. No responsibility or liability is accepted for any differences of interpretation of legislative provisions and related guidance on which it is based.

Part Two: CCP client account structures

As noted in Part One B, each CCP may offer at least one Omnibus Client Account and/or at least one Individual Client Account. This Part Two contains an overview of the main levels of segregation within each account type with respect to direct clearing and within each account type which is likely to be offered with respect to indirect clearing, together with an overview of the main protections afforded by and the main legal implications of each account type. You should note that if a CCP offers multiple types of Omnibus Client Accounts and/or Individual Client Accounts we may not ourselves be offering every one of those accounts.

The descriptions given in this Part Two are very high level and consider only the typical features of these client account types and the minimum requirements for indirect client account types under the Indirect Clearing RTS, and the respective levels of segregation. The particular characteristics of the accounts will affect the exact levels of protection they offer and the legal implications so you must review the information provided by the CCPs to fully understand the risks of the specific account we maintain in relation to you at each CCP.

Each CCP is required to publish information about the client account structures it offers under EMIR and we have provided a link to the website of each CCP we use. You may also need to seek professional advice to understand the differences in detail. However, we hope that the questions raised and factors described in both parts of this document will help you to know which questions to ask and to understand the impact of the answers you receive.

The descriptions of the client accounts have been prepared on the basis of publicly available documents made available by a selection of CCPs. We are not responsible for, and do not accept any liability whatsoever, for any content or omissions or inaccuracies contained in the information produced by any CCP. The descriptions of the indirect client accounts have been prepared on the basis of the minimum requirements in the Indirect Clearing RTS.

The Annex seeks to compare the main account types and levels of segregation against the following risks:

Risks used to compare each account type and level of segregation	Explanation of risk
Transit Risk	Whether you are exposed to us at any point in the process of providing or receiving margin in respect of Client Transactions.
Fellow Client Risk	Whether assets provided to the CCP in respect of CCP Transactions related to you/ your clients could be used to cover losses in CCP Transactions relating to another client/ clients of another client.
Liquidation Risk	Whether, if the CCP Transactions and assets relating to them were to be ported, there is a risk that any non-cash assets would be liquidated into cash. If this were to happen, the value given to such assets by the CCP may differ from what you perceive to be the full value of the assets.
Haircut Risk	Whether the value of the assets that relate to CCP Transactions might be reduced or not increase by as much as you expect because the CCP applied a haircut that did not properly reflect the value of the asset.
Valuation Mutualisation Risk	Whether the value of the assets that relate to CCP Transactions could be reduced or not increase by as much as you expect because the assets posted in relation to other clients' CCP Transactions have decreased in value.
CCP Insolvency Risk	Whether you are exposed to the insolvency or other failure of the CCP.

You should note that these risks are linked to the nature of the collateral provided and each one may be more or less relevant to you depending on the type of collateral that you provide.

Typical account characteristics at the CCP level

	Net Omnibus Client Account	Basic Omnibus Indirect Client Account	Gross Omnibus Client Account	Gross Omnibus Indirect Client Account	Individual Client Account
Who will the CCP Transactions recorded in the account relate to?	Net Omnibus Client Accounts record assets and CCP Transactions that relate to you and the assets and CCP Transactions that relate to one or more of our other clients.	Basic Omnibus Indirect Client Accounts record assets and CCP Transactions that relate to your clients that have opted for a Basic Omnibus Indirect Client Account and the assets and CCP Transactions that relate to the clients of our other clients that have opted for Basic Omnibus Indirect Client Account.	Gross Omnibus Client Accounts record assets and CCP Transactions that relate to you and the assets and CCP Transactions that relate to one or more of our other clients.	Gross Omnibus Indirect Client Accounts record assets and CCP Transactions that relate to your clients that have opted for a Gross Omnibus Indirect Client Account.	Only assets and CCP Transactions that relate to you should be recorded in an Individual Client Account.
Which losses can assets recorded in the account be used for?	Assets that are provided to the CCP as margin for a CCP Transaction recorded in a net Omnibus Client Account may be used to cover any losses in that account, whether such losses relate to the CCP Transactions relating to you or CCP Transactions relating to another client (but will not be used to cover any losses relating to house transactions).	Assets that are provided to the CCP as margin for a CCP Transaction recorded in a Basic Omnibus Indirect Client Account may be used to cover any losses in that account, whether such losses relate to the CCP Transactions relating to your clients or CCP Transactions relating to clients of our other clients (but will not be used to cover any losses relating to house transactions).	Assets that are provided to the CCP as margin for the CCP Transactions recorded in a gross Omnibus Client Account may be used to cover any losses in that account, whether such losses relate to the CCP Transactions relating to you or CCP Transactions relating to another client (but will not be used to cover any losses relating to house transactions).	Assets that are provided to the CCP as margin for the CCP Transactions recorded in a Gross Omnibus Indirect Client Account may be used to cover any losses of any of your clients in that account (but will not be used to cover any losses relating to house transactions).	Assets that are provided to the CCP as margin for CCP Transactions recorded in an Individual Client Account may only be used to cover losses in that account.
Will the CCP know which CCP Transactions and types of assets relate to you/ your clients?	The CCP may or may not know which CCP Transactions and assets recorded in a net Omnibus Client Account relate to you.	The CCP may or may not know which CCP Transactions and assets recorded in a Basic Omnibus Indirect Client Account relate to your individual clients.	The CCP may or may not know which CCP Transactions and assets recorded in a gross Omnibus Client Account relate to you.	The CCP will know which CCP Transactions relate to your clients, but may not know which types of assets relate to your clients.	Yes
Will the CCP record the assets provided by value only or will it identify the type of asset provided?	The CCP may identify in its records the type of asset provided as margin for the net Omnibus Client Account but will not	The CCP may identify in its records the type of asset provided as margin for the Basic Omnibus Indirect Client Account but	The CCP may identify in its records the type of asset provided as margin for the gross Omnibus Client Account but is	The CCP may identify in its records the type of asset provided as margin for the Gross Omnibus Indirect Client	The CCP should identify in its records the type of asset provided as margin for an Individual Client

	Net Omnibus Client Account	Basic Omnibus Indirect Client Account	Gross Omnibus Client Account	Gross Omnibus Indirect Client Account	Individual Client Account
	be able to identify which type of assets relate to any client's CCP Transactions within that net Omnibus Client Account.	will not be able to identify which type of assets relate to any indirect client's CCP Transactions within that Basic Omnibus Indirect Client Account.	unlikely to be able to identify anything other than the value of the assets provided in respect of any client's CCP Transactions within that gross Omnibus Client Account.	Account but is unlikely to be able to identify anything other than the value of assets provided in respect of any of your client's CCP Transactions within that Gross Omnibus Indirect Client Account.	Account.
Will the CCP Transactions recorded in the account that relate to you be netted against CCP Transactions that relate to our other clients?	It is likely that CCP Transactions that relate to you may be netted with CCP Transactions that relate to our other clients whose CCP Transactions are recorded in the same net Omnibus Client Account.	It is likely that CCP Transactions that relate to your clients may be netted with CCP Transactions that relate to clients of our other clients whose CCP Transactions are recorded in the same Basic Omnibus Indirect Client Account.	CCP Transactions that relate to you should not be netted with CCP Transactions relating to any of our other clients recorded in the same Gross Omnibus Client Account.	CCP Transactions relating to any one of your clients in the account will be netted with other CCP Transactions relating to that same client. However, CCP Transactions relating to that client should not be netted with CCP Transactions relating to any of your other clients recorded in the same Gross Omnibus Indirect Client Account.	No
Will the margin be calculated on a gross or net basis?	The margin will be calculated on a net basis.	The margin will be calculated on a net basis.	The margin will be calculated on a gross basis.	The margin will be calculated on a gross basis.	The margin requirement for an Individual Client Account will typically be calculated on a net basis.
Will you have to enter into any documentation or operational arrangements directly with the CCP?	You may have to enter into legal documentation to which the CCP is party. It is unlikely that you will have to set up any operational arrangements with the CCP directly.	You may have to enter into legal documentation to which the CCP is party. It is unlikely that you will have to set up any operational arrangements with the CCP directly.	You may have to enter into legal documentation to which the CCP is a party. It is possible but unlikely that you will have to set up operational arrangements with the CCP directly.	You may have to enter into legal documentation to which the CCP is party. It is possible but unlikely that you will have to set up some operational arrangements with the CCP directly.	You may have to enter into legal documentation to which the CCP is a party. It is also possible that you will have to set up some operational arrangements with the CCP directly.

	Net Omnibus Client Account	Basic Omnibus Indirect Client Account	Gross Omnibus Client Account	Gross Omnibus Indirect Client Account	Individual Client Account
Transit Risk³	Yes. Transit risk may be mitigated if margin were to be held in the form of cash as client money.	Yes. Transit risk may be mitigated if margin were to be held in the form of cash as client money.	Yes. Transit risk may be mitigated if margin were to be held in the form of cash as client money.	Yes. Transit risk may be mitigated if margin were to be held in the form of cash as client money.	Yes. Transit risk may be mitigated if margin were to be held in the form of cash as client money.
Fellow Client Risk	Yes	Yes	Yes	Yes	No
Liquidation Risk	Yes (unless the CCP is able to port the assets recorded in the account or is able to transfer the assets to you without needing to liquidate some or all of them first).	Yes	Yes (unless the CCP is able to port the assets recorded in the account or is able to transfer the assets to you without needing to liquidate some or all of them first).	Yes (unless the CCP is able to port the assets recorded in the account or is able to transfer the assets to you without needing to liquidate some or all of them first).	Yes (unless the CCP is able to port the assets recorded in the account or is able to transfer the assets to you without needing to liquidate some or all of them first).
Haircut Risk	Yes	Yes	Yes	Yes	Yes
Valuation Mutualisation Risk	Yes	Yes	Yes	Yes	No
CCP Insolvency Risk	Yes	Yes	Yes	Yes	Yes
How likely it is that porting will be achieved if we default?	There is a significant risk that porting will not be achieved in respect of positions and assets recorded in a net Omnibus Client Account.	Unlikely	There is a significant risk that porting will not be achieved in respect of positions and assets recorded in a gross Omnibus Client Account.	If you have satisfied all of the CCP's and back-up clearing member's conditions, porting is more readily facilitated in the event of our default.	If you have satisfied all of the CCP's and back-up clearing member's conditions, porting is more readily facilitated in the event of our default.

Additional features that may be available for Individual Client Accounts

Some CCPs may offer additional Individual Client Accounts with special features that have been designed to mitigate certain of the risks identified under "Typical account structures" above. Below is a high level overview of some of the common additional features. The extent to which any risks are mitigated by these additional features, if at all, will depend on the structures used by an individual CCP. Again, therefore, you must review the information provided by the CCPs in order to evaluate the actual risks to you and you may need some professional advice. It is likely that these additional features will only be available to certain types of clients that meet each CCP's requirements. These additional features are not required by EMIR. Accordingly, not all CCPs will offer them nor are we obliged to facilitate access to them.

Additional feature	High level overview of the additional feature	Which risks might this feature mitigate?
Extended porting period	In the event of our default, this feature has been designed to allow more time for porting to be achieved. For a set period of time (decided by the CCP) following our default, the CCP Transactions and assets that relate to you will continue to be held in an account which the CCP will identify as directly relating to you and during that time the CCP may treat you as an "interim Clearing Member". If you find a back-up clearing broker, these CCP	This may make porting more likely to be achieved.
